

Year 6

Year 6 have been writing about natural disasters this week - they have written a story and a diary entry about a natural disaster. The results have been great. Children have been able to apply their learning from topic into their writing to good effect. In maths we have been working on a variety of concepts, including co-ordinates, fractions and measuring angles.

We have seen an improvement in children's reading records - thank you for your support with this. It is so important that children read daily and talk to you about the books they read.
