

Year 4

This week in Year 4 children have been comparing learning in Chembakolli to learning in London. They found some similarities but also many differences. Did you know that children who live in Chembakolli sometimes see elephants on their way to school? In Science, we have been investigating circuits and found out what they need to work. Next week, we will be investigating different materials to test which ones allow electricity to pass through the circuit.

Next week, in Maths, we will be learning how to collect information to answer questions and show our findings using bar charts, pictograms and Venn diagrams. In Literacy, we will begin looking at the features of newspapers and we will be writing headlines. Please look out for any suitable articles you wish to share with the class and bring them in next week.

Keep up the good work Year 4!
