

Reception Writes about Journeys into Space

We have been writing about journeys into space and we have been reading "How to catch a star" by Oliver Jeffers. What an amazing story! We have also been doing some fantastic writing too!

In Maths we have been learning how to take away objects and we did some super number sentences to represent what we found e.g $10-4=6$.

Please continuing practicing reading and spelling word pocket words with your child to support them with their reading.

A big thank you to all the parents who attended 'Family Thursday'. We hope you found it useful and feel more informed about how to help your child with maths at home. Should you have any further

questions, please do not hesitate to contact Mrs Etienne-Barnett.
