

Pupils with Medical Conditions and Administration of Medicines policy

Audience:	Parents Academy Staff and Volunteers Local Governing Bodies Trustees Local Authorities
Ratified:	REAch2 Trust Board July 2025 Woodside edited September 2026
Other related policies:	First Aid Health & Safety Inclusion/SEND
Policy owner:	Helen Beattie, Head of Safeguarding
Review:	Every three years

At REAch2, our actions and our intentions as school leaders are guided by our Touchstones.

Leadership

Finding the leader in all of us.

Inclusion

Realising the greatness in our difference.

Learning

Creating exceptional opportunities for learning.

Enjoyment

Loving what we do.

Inspiration

Feeling the power of the possible.

Integrity

Being courageously true to our purpose.

Responsibility

Unwavering commitment to seeing things through.

1. Aims

This policy aims to ensure that:

- Pupils, staff and parents understand how our school will support pupils with medical conditions
- Pupils, staff and parents understand how our school will support pupils with administration of any medicines
- Pupils with medical conditions and requirements for administration of any medicines are properly supported to allow them to access the same education as other pupils, including school trips
- The safety and welfare of pupils, including their physical and mental wellbeing, is promoted at all times
- A culture of safety, equality and protection is promoted

We will ensure implementation of this policy by:

- Making sure sufficient staff are suitably trained
- Making staff aware of a pupil's condition, where appropriate
- Making sure there are cover arrangements to ensure someone is always available to support pupils with medical conditions and administration of medicines
- Developing and monitoring healthcare plans
- Developing individual Personal Emergency Evacuation Plans (PEEPs)

The named person with responsibility for implementing this policy is:

Justine Heath, Head of School

Mina Mawi, SENCo and Assistant Head

2. Legislation and statutory responsibilities

This policy meets the requirements under Section 100 of the Children and Families Act 2014, which places a duty on governing boards to make arrangements for supporting pupils at their school with medical conditions. It is based on the requirements outlined in the Department for Education's statutory guidance 'Supporting pupils at school with medical conditions', and is intended to be in accord with all other statutory/guidance documents referenced therein. Please see the statutory guidance itself for further information. This policy is also in adherence to requirements for Early Years pupils, as per the Department for Education's statutory guidance 'Early years foundation stage statutory framework for group and school based providers'.

For the purposes of this policy, 'parents' refers to any individual who holds parental responsibility for the child in question.

3. Roles and responsibilities

3.1 The governing body

The governing body has delegated responsibility to make arrangements to support pupils with medical conditions, which includes the administration of medicines. The governing body will ensure that sufficient staff have received suitable training and are competent before they are responsible for supporting children with medical conditions and/or administration of medicines.

3.2 Key roles

The Headteacher will:

- Make sure all staff are aware of this policy and understand their role in its implementation
- Ensure that there is a sufficient number of trained staff available to implement this policy and deliver against all healthcare plans and requirements for administration of medicines, including in contingency and emergency situations
- Take overall responsibility for the development of healthcare plans
- Ensure that liaison takes place with named healthcare professionals in the case of any pupil who has a medical condition that may require support at school
- Ensure that effective systems are in place for obtaining information about a child's medical needs and any needs for administration of medicines, and that this information is kept up to date

The SENCo will:

- Ensure that all information and overviews are updated for the new academic year and within the academic year.
- Follow the Medical needs and Allergies Pathways (See Appendix A, Appendix B)

The Office will:

- Notify the Inclusion team of a new medical need/ change
- Book and update training registers
- Follow the Medical Needs Pathway (See Appendix C)

The Lead MDA will:

- Liaise with the Office Medical Lead
- Ensure all MDA staff have an awareness of children with medical needs
- Follow the Medical Needs Pathways (See Appendix D)

3.3 Staff

Supporting pupils with medical conditions during school hours is not the sole responsibility of one person. Any member of staff may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines. Those staff who take on the responsibility to support pupils with medical conditions and/or administration of medicines will receive sufficient and suitable training, including modules offered by Flick (REAch2's online learning platform) and additional training resources provided by the Shared Services team. Staff will be required to achieve the necessary level of competence before administering medicines, and are covered by the Academy's liability insurance, a copy of which is available on request. Teachers will take into account the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

3.4 Parents

Parents will:

- Provide the school with sufficient and up-to-date information about their child's medical needs, including required information about administration of medicines
- Be involved in the development and review of their child's healthcare plan
- Carry out any action they have agreed to as part of the implementation of the healthcare plan
- Submit a completed permission form prior to before bringing medicine into school
- Provide the school with the medicine their child requires
- Notify the school if their child's medical condition and/or medicine changes or is discontinued, or any changes in the dose or administration method

- Ensure they, or another nominated adult, are contactable at all times in case of medical emergencies. N.B. we request that there are two or more emergency contact phone numbers for all pupils

3.5 Pupils

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. Pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their healthcare plan. They are also expected to comply with their healthcare plan.

4. Equal opportunities

We understand our responsibility to actively support pupils with medical conditions to participate in school activities, including trips and visits, and not prevent them from doing so. The school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely. Risk assessments for any activity will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included, which will include any need for administration of medicines. In doing so, pupils, their parents and any relevant healthcare professionals will be consulted.

5. Being notified that a child has a medical condition

Parents are expected to notify the school as soon as they are aware of a new medical condition, or any changes to an existing medical condition, for their child. When notified of this, the process outlined below will be followed to decide whether the pupil requires a healthcare plan. The school will make every effort to ensure that arrangements are put into place within two weeks, or by the beginning of the relevant term for pupils who are new to our school.

6. Healthcare plans

The Headteacher has overall responsibility for the development of healthcare plans for pupils with medical conditions. Operational oversight of these tasks has been delegated to:

Justine Heath, Head of school
Mina Mawi, SENCo

Not all pupils with a medical condition will require a healthcare plan. It will be agreed with a healthcare professional and/or parents when a healthcare plan would be inappropriate or disproportionate. This will be based on evidence.

Healthcare plans will be developed with the pupil's best interests in mind and will set out what needs to be done, when and by whom. They will be drawn up in partnership with the school, parents and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate. The healthcare plan will be linked to, or become part of, any education, health and care (EHC) plan. If a pupil has SEN but does not have an EHC plan, the SEN will be mentioned in the healthcare plan as required. The final agreement of a parent will be sought before implementation.

The level of detail in the healthcare plan will depend on the complexity of the child's condition and how much support is needed. The following factors as a minimum will be considered when deciding what information to record:

- The medical condition, its triggers, signs, symptoms and treatments
- The pupil's resulting needs, including medicine (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons
- Specific support for the pupil's educational, social and emotional needs; for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions
- The level of support needed, including in emergencies. N.B. if a pupil is self-administering any medicines, this will be clearly stated with appropriate arrangements for monitoring
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable
- Who in the school needs to be aware of the pupil's condition and the support required
- Arrangements for written permission from parents for any medicines to be administered by a member of staff, or self-administered by the pupil during school hours
- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments
- Where confidentiality issues are raised by the parent/pupil, the designated individuals to be entrusted with information about the pupil's condition
- What to do in an emergency, including who to contact, and contingency arrangements

Please see the appendices to this policy for healthcare plans, templates for general conditions, and for asthma and anaphylaxis specifically, which are recommended for use. Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed. They will be stored confidentially, but within easy access of relevant staff.

Administration of medicines

If administration of medicines is required during the school day, parents are requested to inform the school as soon as possible. Upon advice of the British Medical Association, both prescribed and non-prescribed medicines, i.e. for hayfever, can be administered at school. In the case of prescribed medicines, parents will be required to provide evidence from the child's GP. Evidence of any required change to prescribed medicines must be provided to the school immediately to ensure immediate implementation, which will be clearly recorded by school staff to ensure the change is effectively communicated. This may require supplying newly labelled prescriptions or items in line with such changes. In the case of non-prescribed medicines, parents will be required to share the reasoning for the administration of the medicines and the anticipated timescale for this prior to the school giving agreement to do so. Where possible, we request that medicines be administered at home by parents before or after school, unless otherwise stated by a medical professional. We have a small supply of Calpol that can be administered with parental permission.

Anaphylaxis and Emergency Medication

The school maintains spare adrenaline auto-injectors (AAIs) for emergency use. Pupils at risk of anaphylaxis must have an up-to-date healthcare plan and parental consent in place. Staff will receive appropriate training in recognising the signs and symptoms of suspected anaphylaxis and administering an AAI. Where a pupil's own device is unavailable, expired, damaged, or where anaphylaxis is suspected and immediate treatment is required, a spare school AAI may be administered in accordance with the child's healthcare plan and school procedures. Following the administration of adrenaline, emergency services will be called immediately and parents/carers will be informed as soon as practicable.

All staff authorised to administer medicines will follow administration procedures as advised by a healthcare professional and as agreed with the parents and child. Two members of staff will witness the administration of medicine. Where the medicine requires specialist technique or equipment, e.g. inhaler, the members of staff responsible for administration will be required to demonstrate competence before taking on this role, as assessed by the Headteacher/Head of School/SENCo and additionally by a healthcare professional if required. In the event of pain medicine needing to be administered as part of a care plan, or in the event of administration of non-prescription pain medicine, explicit consent will be needed from parents in order to check the most recent dosage and ensure administration is within safe guidelines. In this instance, contact will be made with parents to clarify the most recent dosage and to agree further administration of the pain medicine, if necessary. A written record of this discussion will be requested to be signed by parents at the end of the school day. Parents have the opportunity to come into school to administer any medicines should they wish to do so, or if this is deemed the most appropriate option for the child. If a child refuses to take medicines, staff will not force them to do so, but will note this in the records and inform parents immediately or as soon as is reasonably possible.

We may, in the event of a critical situation, administer medicine to a child without consent of a parent if the First Aider or medical services believe there is imminent life risk. Parents will be informed of this action as soon as is practically possible. We have a 'spare' asthma inhaler and auto adrenaline injector for administration to pupils in the event of an emergency, as directed by medical staff.

Receipt, storage and disposal of medicines

We will compile a medicines list detailing information concerning all medicines for which we have permission to be administered within the school, including details of dose and frequency. It will also include the expiry date of each medicine, which will be monitored and kept under regular review to avoid administering expired medicines. The medicines list will be stored confidentially, but within easy access of relevant staff.

Forest Site

- All medicine in the medical room is stored in an unlocked cupboard.
- Within medicine cupboards, all medication is stored in zip-lock wallets (Epipens, Antihistamine and Epilepsy medication) named for each child with their IHP and there is a basket dedicated to each year group
- Children do not have access to the medical room unaccompanied and the school office is staffed throughout the school day
- Inhalers are stored in classrooms within unlocked cupboards
- At lunchtime, midday staff will take the class inhalers to the first aid area.

Bridge Site

- All medicine in the medical room is stored in an unlocked cupboard.
- Within medicine cupboards, all medications are stored in zip-lock wallets (Epipens, Antihistamine and Epilepsy medication) named for each child with their IHP and there is a labelled box dedicated to each year group
- Children do not have access to the medical room unaccompanied and the school office is staffed throughout the school day
- Inhalers are stored in classrooms within unlocked cupboards
- At lunchtime, midday staff will take the class inhalers to the first aid area.
- Inhalers are delivered to the lunchtime first aid point by classroom monitors.

In both medical rooms, there are fridges for storing medication– with labelled storage trays for each year group – if required.

Short term medication

All parents present medication in pre-filled syringe, which is observed by school staff and then to be administered by school staff

Long term medication

Dosage is logged onto form when given to school.

- In event of an emergency e.g. Fire alarm, teaching staff take inhalers and office staff to bring out locked cupboard medication from boxes and fridge

All medicines must be delivered to the school office by the parent in person, who will then be required to complete and sign an online permission form (see appendix) Under no circumstances will medicines be left in a child's possession, unless immediate emergency treatment is expected to be required, i.e. use of inhaler during sporting activity. We can only accept medicines in their original containers as dispensed by a healthcare professional, complete with original labels and/or accompanying written directions. We cannot accept medicines that have been taken out of their original container. Each item of medicine must be clearly labelled with the following information:

- Pupil's name
- Name of medicine(s)
- Dosage
- Frequency and timing of administration
- Date of dispensing
- Storage requirements (if relevant)
- Expiry date

If relevant, parents are required to provide full details of any rescue therapy, including the dosage and frequency of administration, and any additional action to be taken if this is not effective.

It is the parent's responsibility to ensure that all medicines are in date and suitable for use. The member of staff receiving the medicines will check the items against the information stated on the form, and place the items in the approved storage location, clearly named and labelled. Where a child is prescribed emergency medicines (e.g. inhaler, auto adrenaline injector) it will be stored in a location that is easily available if required in an emergency, including during any external activity or trip. Emergency medicines will be collected by staff in the event of any evacuation, i.e. fire drill, to ensure they remain accessible. If required, the temperature of the facility used to store any medicines, including a medicines fridge, will be recorded on a daily basis to ensure that the required temperature is maintained.

In the event of medicines needing to be transported to and from school on a daily basis, i.e. antibiotics, the parent is responsible for ensuring that both delivery and collection occurs.

The school is not responsible for disposing of medicines and in the event that medicines are out of date then parents will be requested to collect it. Parents are responsible for ensuring that expired or unwanted medicines are returned to the pharmacy for safe disposal. Parents must collect all unused medicines at the end of the agreed administration period. Should medicines be left at school beyond three months, despite attempts made to contact the parent to collect it, it will be given by the school to a pharmacy for safe disposal.

Documentation

Each occasion where medicines are administered will be recorded on an administration of medicines form (see Appendix A) This information is confidential to school staff and will be stored and retained securely in line with REAch2's record retention policy.

Policy review

This policy will be reviewed every three years. Review will take place more regularly in the event of changes to statutory requirements, or in light of feedback arising from pupils, parents or staff involved with supporting pupils with medical conditions and/or administration of medicines.

Appendix A

Woodside Primary Academy Medical Needs Pathway

Medical Needs Pathway – New Admissions

New parents fill out the school's application form with medical information and return it to the office manager.

Parent contact the school regarding a change in Medical Need for their child ie escalation of condition or new condition developed

Office manager to notify the inclusion team about medical needs on the same day as the form is returned & cc in Office Medical Need. This is before the child is given a start date.

- Ascertain if training is required (Inclusion Team)
- Required training to be booked (Office)

Allergy requiring no medication:

- No care plan required
- Lanyard to be made

Child can start school

Allergy requiring medication:

- Inclusion team / office contact parents on the same day.
- NHS care plan from GP/hospital must be obtained before start date allocated

High Needs Medical ie Epilepsy/Diabetes

- HOS / Inclusion team / office contact parents on the same day
- NHS care plan from GP/Consultant must be obtained before start date allocated

NHS care plan received.

Actions:

- Check NHS care plan is signed/stamped by Hospital/Doctor (Office)
 - School Healthcare Plan/School Procedures written (Inclusion Team)
 - Arbor medical tab completed (Office)
 - Yellow lunch lanyard created & medical information updated (Office)
 - New yellow lanyard given to Senior MDA (Office)
- Office to refer to attached guidelines

The care plan/guidelines must be shared with the following staff by Inclusion Team: Classroom Teacher, LSA/EYP

Year Group Leader & Assistant Head Senior LSA

Senior MDA

Any other relevant staff

An awareness of the child's needs must be shared with the following staff by Inclusion Team: Headship Team

SLT

Year Group Team PPA/CoverTeam

Middays

**All care plans must be saved/scanned into the following locations:
Shared Drive – Medical Folder, Google Drive Year Group Folder**

Appendix B

Woodside Primary Academy Medical Needs Pathway

Medical Needs Pathway

New Academic Year Set Up – Role of SENCO

End of Academic Year Tasks

- Update overviews & information for the following academic year
- Ensure all medication due to expire in the summer holidays is updated prior to school closure
- Check for any Health Care Plans due for renewal in September & contact parents to ascertain if any needs have changed
- Ensure information from Year 3 to Year 4 is transferred from Forest to Bridge site

Start of Academic Year Tasks

- Share Year Group needs registers with Lead MDA (email Inclusion Team when this is completed)
- Transfer of Medication/Information from Forest Site to Bridge Site in preparation for Year 4 starting

Appendix C

Woodside Primary Academy Medical Needs Pathway

Medical Needs Pathway – Office Roles

Office manager notifies of new medical need/change & Inclusion Team identifies training need & staff to be trained

Office actions:

- Book required training
- Update training registers

NHS care plan received.

Office actions:

- Arbor medical tab completed
- Yellow lunch lanyard created & medical information updated
- Kitchen dietary card to be created for kitchen & Senior MDA

Inclusion Team creates Healthcare plan

Office actions:

- Add / amend child's needs to Year Group Medical Register
- Add/amend child's medication to medicine overview & log expiry date
- Medication to be labelled & stored in cupboard in medical room
- MDA overview to be updated to reflect new medical needs/amendment
- Email Inclusion Team to confirm all information has been updated & shared with Senior MDA

All care plans must be save/scanned into the following locations:

Shared drive-Medical Folder

Appendix D

Woodside Primary Academy Medical Needs Pathway

Medical Needs Pathway – Lead MDA Roles

Office inform Senior MDA of new pupil with medical need & provide yellow lanyard & medical card

Actions:

- Share information about the child with MDAs
- Ensure all MDAs have an awareness of those children with high medical needs such as epilepsy, diabetes etc.
- Store copy of child's care plan in MDA medical file

All care plans must be saved in the MDA Medical File & locked away when not being used.

Appendix 4 – Asthma care plan (from [Asthma.org.uk](https://www.asthma.org.uk))

School Asthma Card

To be filled in by the parent/carer

Child's name

Date of birth

Address

Parent/carer's name

Telephone – home

Telephone – mobile

Email

Doctor/nurse's name

Doctor/nurse's telephone

This card is for your child's school. **Review the card at least once a year and remember to update or exchange it for a new one if your child's treatment changes during the year.** Medicines and spacers should be clearly labelled with your child's name and kept in agreement with the school's policy.

Reliever treatment when needed

For shortness of breath, sudden tightness in the chest, wheeze or cough, help or allow my child to take the medicines below. After treatment and as soon as they feel better they can return to normal activity.

Medicine	Parent/carer's signature

If the school holds a central reliever inhaler and spacer for use in emergencies, I give permission for my child to use this.

Parent/carer's signature Date

Expiry dates of medicines

Medicine	Expiry	Date checked	Parent/carer's signature

Parent/carer's signature Date

What signs can indicate that your child is having an asthma attack?

Does your child tell you when he/she needs medicine?

☐ Yes ☐ No

Does your child need help taking his/her asthma medicines?

☐ Yes ☐ No

What are your child's triggers (things that make their asthma worse)?

- ☐ Pollen ☐ Stress
☐ Exercise ☐ Weather
☐ Cold/flu ☐ Air pollution

If other please list

Does your child need to take any other asthma medicines while in the school's care?

☐ Yes ☐ No

If yes please describe

Medicine	How much and when taken

Dates card checked

Date	Name	Job title	Signature / Stamp

To be completed by the GP practice

What to do if a child is having an asthma attack

- 1 Help them sit up straight and keep calm.
- 2 Help them take one puff of their reliever inhaler (usually blue) every 30-60 seconds, up to a maximum of 10 puffs.
- 3 Call 999 for an ambulance if:
 - their symptoms get worse while they're using their inhaler – this could be a cough, breathlessness, wheeze, tight chest or sometimes a child will say they have a 'tummy ache'
 - they don't feel better after 10 puffs
 - you're worried at any time.
- 4 You can repeat step 2 if the ambulance is taking longer than 15 minutes.

Appendix 5 – Anaphylaxis care plan requiring Epi Pen (from BSACI.org, see website for other templates)

NAME – Individual Healthcare Plan for allergy		
Date of birth:		Current photo
Year / class:		
Emergency contacts:		
#1:	#2:	
Allergy: <i>Note what allergy the child or young person has.</i> <i>Note any known allergens.</i> <i>Note whether the child or young person is likely to be aware that they are having an allergic reaction and whether they can alert others.</i>		
How the allergy is managed: <i>Note any care or action plans or prescribed medication issued by healthcare professionals.</i> <i>If the allergy can be partly or wholly managed by practical adjustments (for example avoidance of known allergens), note them here.</i> <i>Note the extent to which the child or young person is able to take responsibility for managing their allergy.</i>		
Impact on education: <i>Indicate the potential harm which might come to the child or young person if their allergy is not managed properly.</i> <i>Indicate how the allergy may impact on the child or young person's learning.</i> <i>Indicate how the allergy may impact on the child or young person's emotional wellbeing.</i> <i>If relevant, note any interaction between allergy and SEN.</i>		
Arrangements for support: <i>Give details of the specific support or adaptations which the school, college or early years setting will put in place, within its educational remit.</i> <i>Outline measures to reduce the risk of contact with known allergens.</i> <i>Give details of the specific support or adaptations to manage food allergy at meal and snack times.</i>		

<i>Note arrangements for maintaining educational progress where absence or missed learning occurs due to allergy.</i>	
Visits and trips: <i>Give details of any arrangements or procedures which may be required for school trips or other activities outside of the normal timetable that will ensure the child can participate.</i> <i>Note any requirement for a risk assessment and prompts for specific issues which should be considered.</i>	
Emergency response: <i>Where an Action Plan issued by a healthcare professional covers emergency response, refer to it and ensure it is attached.</i> <i>Otherwise summarise the signs or symptoms which would indicate an emergency.</i> <i>Set out what to do in an emergency, including whom to contact.</i> <i>If relevant, note where “spare” adrenaline devices are located.</i>	
Last discussed with parents:	Date
Next planned review:	Date:

NAME – Individual Healthcare Plan for allergy - medication	
Non-prescription medication: <i>Record any <u>non</u>-prescription medication (e.g. oral antihistamines) which the child or young person may require to manage their allergy in the education setting</i> <i>Note whether it is emergency medication; where the medication is stored; and how and when the child or young person may need access</i>	
Parental consent:	Date:
Prescription medication: <i>Record any prescription medication for allergy prescribed by a healthcare professional (e.g. adrenaline).</i> <i>Note whether it is emergency medication; where the medication is stored; and how and when the child or young person may need access.</i>	
Prescribed by:	Date:
Parental consent:	Date:
Use of “spare” adrenaline devices:	

<i>Note whether parental consent has been given to administer adrenaline (e.g. using “spare” adrenaline devices) in an emergency.</i>	
Parental consent:	Date:
Use of “spare” salbutamol inhaler: <i>If relevant (i.e. the child or young person is prescribed an asthma reliever inhaler), note whether consent has been given to use a “spare” salbutamol reliever inhaler.</i>	
Parental consent:	Date:

NAME – Individual Healthcare Plan for allergy - Care or Action Plans issued by healthcare professionals	
Allergy / Asthma Action Plan: <i>Attach any Action Plan to the IHP for use in an emergency.</i> <i>Note which healthcare professional issued the plan, their role and the date issued.</i>	
Issued by:	Date:
Care Plan: <i>Note where any relevant care plan can be found.</i> <i>Note what staff are responsible for delivering / supporting delivery of the care plan.</i> <i>Note which healthcare professional issued the plan, their role and the date issued.</i>

- Swollen lips, face or eyes
- Itchy/tingling mouth
- Hives or itchy skin rash
- Abdominal pain or vomiting
- Sudden change in behaviour

Action to take:

- Stay with the child, call for help if necessary
- Locate adrenaline autoinjector(s)
- Give antihistamine:

(If vomited, can repeat dose)

- Phone parent/emergency contact

Watch for signs of ANAPHYLAXIS (life-threatening allergic reaction)

Anaphylaxis may occur without skin symptoms: ALWAYS consider anaphylaxis in someone with known food allergy who has **SUDDEN BREATHING DIFFICULTY**

A AIRWAY

- Persistent cough
- Hoarse voice
- Difficulty swallowing
- Swollen tongue

B BREATHING

- Difficult or noisy breathing
- Wheeze or persistent cough

C CONSCIOUSNESS

- Persistent dizziness
- Pale or floppy
- Suddenly sleepy
- Collapse/unconscious

IF ANY ONE (OR MORE) OF THESE SIGNS ABOVE ARE PRESENT:

- 1 Lie child flat with legs raised (if breathing is difficult, allow child to sit)

- 2 Use Adrenaline autoinjector **without delay** (eg. EpiPen®) (Dose: . mg)

- 3 Dial 999 for ambulance and say ANAPHYLAXIS ("ANA-FIL-AX-IS")

*** IF IN DOUBT, GIVE ADRENALINE ***

AFTER GIVING ADRENALINE:

1. Stay with child until ambulance arrives, do **NOT** stand child up
2. Commence CPR if there are no signs of life
3. Phone parent/emergency contact
4. If no improvement **after 5 minutes**, give a further adrenaline dose using a second autoinjectable device, if available.

You can dial 999 from any phone, even if there is no credit left on a mobile. Medical observation in hospital is recommended after anaphylaxis.

Emergency contact details:

1) Name:

2) Name:

Parental consent: I hereby authorise school staff to administer the medicines listed on this plan, including a 'spare' back-up adrenaline autoinjector (AAI) if available, in accordance with Department of Health Guidance on the use of AAI in schools.

How to give EpiPen®

PULL OFF BLUE SAFETY CAP and grasp EpiPen. Remember: "blue to sky, orange to the thigh"

Hold leg still and PLACE ORANGE END against mid-outer thigh "with or without clothing"

PUSH DOWN HARD until a click is heard or felt and hold in place for **3 seconds**. Remove EpiPen.

Additional instructions:

If wheezy, GIVE ADRENALINE FIRST, then asthma reliever (blue puffer) via spacer

This is a medical document that can only be completed by the child's healthcare professional. It must not be altered without their permission. This document provides medical authorisation for schools to administer a 'spare' back-up adrenaline autoinjector if needed, as permitted by the Human Medicines (Amendment) Regulations 2017. During travel, adrenaline auto-injector devices must be carried in hand-luggage or on the person, and **NOT** in the luggage hold. This action plan and authorisation to travel with emergency medications has been prepared by:
