

## ASP

This week the children from the provision have been learning how to print. They have looked at enlarged photographs of snowflakes for inspiration in order to create their own unique designs. The children indented their designs into Styrofoam and rolled ink over the surface. They then pressed these onto paper to transfer the snowflake image. Once these images were dry they sprinkled glitter over their prints.

The children used their sparkly snowflakes as festive ornaments and helped decorate one of the Christmas trees at Forest Site.
