

Year 4

It has been another brilliant week in year 4! Children have continued researching facts about our new topic, The Tudors. Children are beginning to learn about the life and wives of Henry VIII which they will use to create an information poster. Next week, in small groups, children will present their findings to their class. In Science, children are beginning to learn about keeping warm. They have tested ways of measuring temperature and will investigate materials which are good insulators of heat.

In Literacy, children wrote exciting stories which were set in the past. Next week, children will begin reading Macbeth. They will explore characters and make predictions. In Maths, children have been practicing using written methods for addition, subtraction, multiplication and division. Children applied their skills by solving worded problems. Next week, we will continue to focus on multiplication and division so please make sure you practise times tables at home.

Don't forget - please ensure that reading journals are completed regularly and returned to school each day.
