

Year 1

This week in Year 1 we have been shape detectives! We looked for different 2D and 3D shapes in the classroom and around the school. We discussed their properties including how many sides, corners, faces and edges they have. We worked together to sort shapes based on their properties and we explained our reasons.

In Geography we have been learning all about the United Kingdom as part of our topic on animals we find in our country and the UK. We know that there are four countries that make up the UK and we looked at lots of maps and atlases to see if we could find them. We even managed to find London!
