Risk Consideration Priority Matrix

	Risk consideration that if not managed has the potential for severe impact on a school, for which the Trust requires information on its management controls to be detailed as part of the school risk management review.
	Risk considerations that, if not managed, may have some impact on the school and should form part of the school risk management review.
	Risk consideration that do not present a significant risk but could form part of the school risk management review.

<p>Instructions for Using This Updated Template:</p> <p>This document is essentially an update to the original Risk Management Plan (RMP) Template issued in May 2020 and follows the issuing of Government Guidance on Full Re-Opening of Schools from September 2020. Please click here to view the full guidance.</p> <p>This new template essentially contains all of the sections found in the original version, however, and to take account of the new Government guidance:</p> <ul style="list-style-type: none"> ☐ Sections highlighted in yellow will need to be reviewed / updated as necessary by the schools in light of the new Government guidance - please note that there will be some resultant changes to wording / content of the Risk Consideration descriptor in relation to these yellow sections. ☐ Sections that are “greyed-out” are, in principle, unaffected by the new Government guidance and the management arrangements / actions / methodology identified in your previous RMP will remain generally appropriate, however, you must still consider their adequacy going forward for the purposes of this updated RMP in the event that those arrangements need revising or upscaling to account for the increased school population on full re-opening. Some updating may also be required to take account based on experience and “lessons learned” since partial re-opening in June ☐ An Appendix (red section) has been incorporated at the end of this document in order to capture brand new issues presented by the new Government Guidance that schools must consider and address with satisfactory management arrangements, further actions and a RAG-Rating. – remember that the requirement is for sensible and proportionate control measures which follow the health & safety hierarchy of control to reduce the risk to the <u>lowest reasonably practicable level given a schools particular and individual circumstances.</u> ☐ Please read through the whole of this template including the new Appendix section prior to completing your updated RMP - any questions, please contact Estates.
