

Year 2

This week in Year 2 we have started learning about The Great Fire of London. We have looked at paintings of the fire and begun to look at what the houses were made of in London at that time. We used information from books and the internet to find out more information. Did you know that the fire started in a bakery? We found out that the fire spread very quickly because the houses were built very close together and were made of wood. There was also a strong wind that helped the fire to spread. We are looking forward to finding out more about The Great Fire of London over the next few weeks.
