

Year 3

This week in year 3 we have worked hard to complete our non-chronological reports about the Romans. We have continued looking at Roman entertainment, such as the amphitheatres, and also looked at family life in the Roman times. We have all created wonderful booklets with all the features of a non-chronological report.

In numeracy we have been learning about fractions. We have spent a lot of our lessons investigating in very hands on ways. We found halves and quarters of different objects, sorted fractions by their different sizes and even made a Roman salad using olives, tomatoes and grapes! We had to make the salads very carefully to make sure we had the right fraction of each ingredient. We also investigated equivalent fractions. Equivalent fractions are fractions which are the same size as another fraction. We really enjoyed using tiles and a fraction wall to find as many as we could.

We can't wait to learn about the story of Romulus and Remus next week.
