

## Year 4

**Read all about it...** this week Year 4 have been learning about the features of newspapers. They have read different articles, looked at catchy headlines and practised using reported speech. Next week, they will be writing their own front page of a newspaper. Look out for the articles they write!

In Maths, they have been looking at different ways of representing data. Next week, they will be learning how to solve word problems involving addition and subtraction as well as practicing mental methods for these operations.

Light it up! Year 4 have been fantastic scientists – they have been investigating materials which conduct and insulate electricity. They found that metals around the classroom such as paperclips, sharpeners and lead pencils allow electricity to pass through. However, rubbers, rulers and paper insulate electricity. Next week, they will continue their science investigations into electricity by exploring how switches work.

Reminder – please remember homework projects are due in on Friday 12<sup>th</sup> December.

Keep up the excellent work Year 4.
