

Year 5

Year 5 visited the Science Museum this week as part of their work on the Good Vibrations topic. Hakim in 5H wanted to share his experience with everyone.

“It was amazing in the Science Museum especially the launch pad. We did different kinds of activities. Each group moved around the museum to explore and learnt new things. Once we finished looking around the museum, we went to the Launch Pad. Everybody was eager to go there. Lunch was awesome, everyone couldn't wait for it to start. When we got to the Launch Pad, everyone was overexcited. Firstly, we had to carry out an experiment. There was a hologram of a watch, it was amazing! Once it was time for the next part, everyone went crazy!! In this part, there were outstanding experiments to do. The best activity was when we had to make the bridge. Other schools helped us to make it, so did Mrs Morris. In the Launch Pad, we made some new friends with other school pupils. When it was time for us to go, everyone felt tired. Once we arrived back at the underground, we went on the train. It was a pleasure for the parents to come and help us. When we arrived at school, we all went home! Uhhhhhhh! What a great trip.”

Thank you to all the parents who supported their children's class with the trip this week. We cannot thank you enough for taking time to be a part of your child's education. Have a great weekend.

The Year 5 team.
