

Year 5

What an exciting week in Year 5! Children visited The Crystal in Royal Victoria. They looked around the building and made notes about how the future may be in 50 years time. Children will use the information they learnt to produce a news report later on in the term. Sabrina in 5S has written a recount which she wanted to share.

“On Tuesday 20th January, 5 Sycamore went to the Siemens Crystal building. When we came into class, the first thing we did was the register. Just by looking at their faces, I could tell everyone was excited. After that, we were put into our groups. As soon as we could, we left the building for the bus.. We stopped at Stratford and then caught a train. At last, we had reached our destination. Silently, we wandered into a sphere and watched a video about problems we’ll face in the future. While we strolled through the exciting activities one by one, we filled in a worksheet. We learnt lots about what our cities will be like in the future. We face problems such as the population being too big, people living at a higher age, more housing will be needed and more people will be living in the cities. (up to 70% by the year 2050).

Afterwards, everyone met up and had a snack. It was about time because I was beginning to feel peckish. We made our way back to school with some of us wanting to sleep. When we finally got to school, we had our lunch. What a BRILLIANT trip!”

A big thank you to all the parents who accompanied the children on the trip. Without your support, we wouldn't be able to take the children to these exciting educational visits.

Also a big thank you to all the parents who regularly support the class teachers with taking the children swimming. Your support is greatly appreciated by the year 5 team and children.

If you are able to support the class teachers on school and swimming trips, please speak to your child's teacher or a member of the Year 5 team.

Have a great weekend. The Year 5 team.
